

Labubu AI Whitepaper

Version 1.0 | June 2025

Abstract

Labubu AI is an AI-powered emotional chatbot ecosystem built for children. Using the ChatGPT API, 3D animated character design, and Web3 tokenomics, Labubu AI offers a safe, fun, and educational chat experience. Each Labubu character embodies a unique personality — from happy to grumpy — and engages in child-friendly conversations. Powered by the LABUBUAI token, the platform integrates NFTs, gamified learning, and a Telegram chatbot to create an immersive Play-to-Earn experience.

Vision

To create a safe, emotionally intelligent AI friend for kids, while integrating Web3 technologies to provide ownership, engagement, and learning opportunities through NFTs and token rewards.

Core Features

1. 20 Emotional Labubu Characters

Each Labubu character has a defined emotional personality such as Happy, Angry, Sad, Funny, Curious, Sleepy, Shy, and more. The AI responses align with each emotion while remaining age-appropriate and educational.

2. ChatGPT Integration

Labubu uses OpenAI's ChatGPT API with custom prompts per character personality. All responses are moderated and filtered for child safety and simplicity.

3. 3D Animated Avatar Engine

Labubu responds with basic animations (mouth, eye movement, body language). Integrations with facial animation APIs like DeepFaceLive or D-ID will enable real-time responses.

4. Telegram Bot Integration

An interactive chatbot experience on Telegram, similar to Kombat Hamster, where users chat, unlock characters, and participate in gamified experiences.

5. LABUBUAI Token Utility

- **Network:** Solana (SPL Token)

- **Name:** Labubu
- **Symbol:** LABUBUAI
- **Total Supply:** 1,000,000,000 LABUBUAI
- **Allocation:**
 - 93% Liquidity
 - 1% Team and Development
 - 2% Marketing
 - 4% Partnership

6. Access Control via Token Gating

- Free limited chat access
- Full character access requires token holding or one-time payment

7. NFT Marketplace

- **Character Skins:** Hair, color, outfits, props
- **Voice & Language Packs**
- **Professional Modes:** Homework helper, Presentation coach, Storytelling buddy
- **All NFTs** are upgradeable and tradable via the in-app marketplace

8. Knowledge Plugins (NFT-based)

Users can unlock extra “brains” for their Labubu via purchasable NFTs:

- **Law Assistant (basic legal info)**
- **Architecture Sketch Helper**
- **Code & Logic Coach**
- **Homework Advisor**

9. Play-to-Earn Game Ecosystem

Gamified missions allow kids to earn tokens, collectibles, or NFT upgrades by:

- Daily check-ins
- Solving puzzles
- Completing learning quests
- Referring friends

Security and Safety

- **Filtered Responses:** No adult content, no harmful queries
 - **Parental Controls:** Optional usage summaries, limits
 - **Moderated Updates:** All prompts reviewed before character release
-

Roadmap Summary

Q2 2025

- Character development (20 emotional types)
- Token deployment & distribution
- Telegram bot MVP

Q3 2025

- NFT marketplace launch
- Animated character integration
- Token-gated app release

Q4 2025

- Knowledge plugin system
- Play-to-Earn beta
- Mobile app launch (iOS & Android)

2026

- Global language support
- Labubu EDU partnerships
- DAO-lite character voting system

Closing Note

Labubu AI blends the magic of AI with blockchain ownership, creating a digital companion that is fun, expressive, and educational. With LABUBUAI, users don't just talk to Labubu — they build, upgrade, and grow with it.
